

OAT HULLS

 Typical Analysis (Dry Matter Basis)	
Crude Fibre	29%
Moisture	8%
Protein	8.5%
Crude Oil	1.5%

FEEDING RATES

- Cattle**
Can make up to 35%-45% of the ration
- *Total digestible nutrients around 37%*
 - *Far more palatable than other roughages*
 - *12 month shelf life*

 **Benefits**

- **Oat Hulls often outperform other sources (of fibre) in the diet because they have a higher passage rate through the animal. Performance is all about intake in absolute quantities and cattle are able to eat more of the oat hulls .**

 **Delivery or Collection**

- **Delivered in 21 tonne bulk tippers- Reliable and Timely service. Call for quote.**
- **or available for collection in bulk @ €80 per tonne**
- **Great value for money.**
